

Equine Acupuncture: Locating "Big Points" on the Live Horse

Course Overview

This short presentation on the locations and innervation of equine acupuncture points is designed as an introduction and/or refresher for those who seek to learn, with confidence, the topographical locations of select acupuncture points on the horse.

The electronic references include a trusted resource, i.e., an electronic version of the "Equine Mini Manual" that provides point locations, innervations, indications, and point combinations of the full set of veterinary acupuncture points typically considered for equine patients.

COURSE DIRECTOR: Narda G Robinson, DO, DVM, MS, FAAMA, CEO and Founder of CuraCore VET

Course Dates, Format, Length of Enrollment

Course Dates: Open and ongoing

Format: Self-paced online module.

Length of Access: One year from date of enrollment.

Continuing Education Hours: 1.0

RACE-approved programs are reviewed under the American Association of Veterinary State Boards Registry of Approved Continuing Education standards; veterinary professionals should verify that the course satisfies the CE requirements of their individual licensing jurisdiction.

Tuition:

\$58 USD.

Prerequisites (Suggested)

- Licensed veterinarian or veterinary student
- Foundational understanding of veterinary anatomy, physiology, neurology, pain management, and general clinical examination skills.
- Commitment to practicing within the scope of veterinary licensure and applicable state, provincial, or national regulations.

Instructor

Dr. Steve Chiasson

Dr. Shawn Dixon

What We Deliver

- Video-based instruction in select equine acupuncture point locations.
- Downloadable course notes and reference materials.
- Self-paced, repeatable quiz to reinforce learning of key concepts.
- Certificate documenting CE hour, subject to passing the assessment and completion of the learning activities.

Learning Objectives for the Series

- Describe point locations for each of the “big points” presented in this module.
- Identify at least one nerve that supplies each point.
- Use palpation to define bony landmarks helpful in finding specific acupuncture points.
- Consider the relevance of point innervation to the physiologic changes associated with point stimulation.

Questions and Contact Information

For questions about registration, course access, CE documentation, or future courses in medical acupuncture, contact the course administrator at info@curacore.org.

For academic or clinical questions, students may submit questions through the online course portal or by contacting **Dr. Narda Robinson** at narda@curacore.org.
